

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

THE
TRANSACTIONS
OF THE
ROYAL IRISH ACADEMY.

VOL. XII.

DUBLIN:

Grasberry and Campbell, Back-lane,
PRINTERS TO THE ROYAL IRISH ACADEMY.

1815.

THE ACADEMY desire it to be understood, that, as a body, they are not answerable for any opinion, representation of facts, or train of reasoning, which may appear in the following Papers. The authors of the several essays are alone responsible for their contents.

	Page
V. <i>An Account of Observations made at the Observatory of Trinity College, Dublin, with an Astronomical Circle, eight feet in diameter, which appear to point out an Annual Parallax in certain fixed Stars.—Also a Catalogue of North Polar distances of forty-seven principal fixed Stars, from recent observations, and a comparison thereof with those of the same Stars, obtained by other Instruments, and by the same Instrument, at a former period. By John Brinkley, D. D. M. R. I. A. F. R. S. and Andrews' Professor of Astronomy in the University of Dublin</i>	*33
VI. <i>Analytical Investigations respecting Astronomical Refractions, and the application thereof to the formation of convenient Tables, together with the results of observations of Circumpolar Stars, tending to illustrate the Theory of Refractions. By John Brinkley, D. D. M. R. I. A. F. R. S. and Andrews' Professor of Astronomy in the University of Dublin</i>	77
VII. <i>Appendix to the Account of Observations made at the Observatory of Trinity College, Dublin, which appear to point out an Annual Parallax in certain fixed Stars, &c. &c. By the Rev. J. Brinkley, D. D. F. R. S. M. R. I. A. and Andrews' Professor of Astronomy in the University of Dublin</i>	119

* The folio of this page, and the seven subsequent ones, are, by an error of the press, duplicates of the folios of the eight preceding pages.

POLITE LITERATURE.
